Background

Latrobe City has a long history of engineering excellence having built local industries around coal-powered electricity generation, open-cut mining operations, oil and gas exploration and extraction, pulp and paper manufacturing, agribusiness, and the various support industries that underpin these sectors.

These activities continue to shape the industrial landscape and forge a region built on innovation, specialist skills, resource utilisation, project delivery and effective environmental management. A key strength of the region lies in the capability of the local workforce, which boasts specialised engineering knowledge, skills, and experience across various industries.

Latrobe City, one of Victoria's four major regional centres, covers 1,422 square kilometres and is located approximately 150 kilometres east of Melbourne, and is accessible to national and international markets via existing transport infrastructure. Specialist businesses provide industrial manufacturing and engineering services to meet the needs of major industrial organisations.

The Latrobe City Industry Alliance has been established to showcase the world-class engineering and manufacturing capability of industry in Latrobe City.

INVEST
LATROBE
CITY

Latrobe City Industry Capabilities

Today's industry expertise represents a journey that commenced in 1894 with the discovery of brown coal.

Businesses that enabled the growth of the energy sector in Victoria exemplify the specialist knowledge and skills that combine to deliver customised solutions that are tailored to meet client needs. Critical to this is the understanding of the need for quality, precision, responsiveness, reliability and accountability, and their impacts on a project outcome.

The specialist businesses showcased within represent a snapshot of skills and ready to support existing industry, as well as new industry which includes but not limited to Advanced Air Mobility, and the New Energy sector's Offshore and Onshore Wind, Hydrogen, Solar, Geothermal, Bioenergy and more. Project-based design, engineering, manufacturing and maintenance service are what this region is known for and built upon.

Latrobe City is a significant driver of the Victorian economy, contributing over \$7.1 billion in Gross Regional Product.

The region's engineering and manufacturing sector supplies major industry, including:

- AGL Loy Yang A 2210 Megawatt power station and open-cut brown coal mine
- Alinta Energy Loy Yang B 1000 Megawatt power station
- Energy Australia 1480 Megawatt power station and open-cut brown coal mine

- Opal Australian Paper Maryvale Mill
- GippsAero, the only commercial aircraft manufacturer in Australia
- RAAF Base East Sale, home to approximately 700 defence personnel
- ExxonMobil's Longford gas and crude oil plants
- ExxonMobil's 23 offshore platforms and installations in Bass Strait

Our skilled tradespeople and workforce has contributed to building the nation with the rollout of road projects, establishment of power generation facilities as well as water, rail and gas projects. A network of business services offer expertise in the design and development of specialist equipment for the mining and major construction sectors.

Our workforce understands heavy industry fabrication requirements from start to finish - from commissioning of specialist equipment to providing assistance and service to better manage equipment fatigue.

Industry in Latrobe City are the innovators, designers, engineers and manufacturers at the forefront of supporting Australia's mining and resource infrastructure development and ongoing operations. Our large, skilled workforce are primed to transition it's long history of advanced manufacturing into supporting the Advanced Air Mobility and Aviation supply chain.

Allform Industries

COMPANY OVERVIEW

Allform Industries is a sheet metal fabrication and light engineering company that have been working to meet industry needs in the resources sector since the late 1990's. The team of fully qualified sheet metal fabricators are experienced in stainless steel, aluminium, mild steel, copper and brass. Using some of the latest CAD packages to design and fabricate to your specifications and drawings.

Allform Industries uses a 4 metre CNC press brake and large table plasma for complex manufacturing, which is brought together by a dedicated team of skilled tradesmen with an emphasis on quality workmanship and excellent customer service.

Avaga

COMPANY OVERVIEW

Avaga is an engineering & drafting company offering comprehensive technical services to the water, mining, agricultural, power generation, manufacturing and defence sectors.

Avaga is a trusted partner for businesses seeking precise, professional, and reliable technical services that contribute to the success and efficiency of their projects.

Our expanding group of experts draw on the latest technology to provide the following services:

- Mechanical and structural engineering
- Drafting and detailing
- Lean manufacturing consulting
- Virtual and physical prototype development
- Asset inspection and site survey
- Design certification

Weldtek Pty Ltd

COMPANY OVERVIEW

Weldtek Pty Ltd specialises in structural steel welding and fabrication services, stainless steel and all aspects of general boilermaking. Established in 2013, Weldtek has rapidly grown into a well-respected company focussed on precision, quality workmanship and excellent customer service. The business is owned, operated and managed by Clinton Styles. He has years of skilled experience and a fully qualified team of tradesmen. All steel is fabricated in their Traralgon workshop, where they always utilise local businesses to transport, erect or supply materials to complete their jobs.
