1 Executive Summary

The fundamental purpose of the Building Asset Management Plan (BAMP) is to improve Latrobe City Council's long term strategic management of its buildings in order to provide infrastructure that is sustainable, appropriate, accessible and responsive to the community. This plan does not address upgrades or alterations to buildings or facilities and concentrates on maintaining existing buildings and structures.

This stage of the BAMP provides a register of buildings and structures, along with the assigned hierarchy that has been allocated to the individual asset based on the best available information. Detailed condition assessments and future long term budget requirements will be the subject of revised versions of this plan.

The BAMP proposes further actions to be completed before the next review due in 2014. These actions include confirming land tenure and building ownership at some sites. Further work is also required on developing Service Levels, Response Times and improved property management, involving standard leases and property inspections at the end of lease periods.

Actions Completed to Date

- Map all Buildings/Structures at each Site.
- Map all Sites.
- Produce Building and Structure Hierarchy.
- Categorise Buildings to Hierarchy.
- Identify and Prioritise Further Actions.

Further Work Identified for High Priority Actions

- Conduct an audit to determine land ownership.
- Conduct an audit to determine which leases are for land use only.
- Update the property database to accurately reflect ownership of land with council buildings.
- Develop levels of service and response times for each hierarchy.
- Standardise leases and inspections at handover between sporting

clubs at end of season.

- Clarify the roles of Council appointed Committees of Management.
- Clarify who undertakes maintenance when LCC is not the committee of management of Crown Land.

Further Work Identified for Lower Priority Actions

- Investigate property management software to be used across departments with property management responsibilities.
- Identify buildings that are underutilised and consolidate users into Latrobe City Council buildings as a preference.
- Decommission redundant buildings.
- Buildings that are not LCC owned, hand back to their owners when possible to do so.
- Consider policy for allocation of facilities.

More details on the next actions proposed can be found in Part 11 of the BAMP, **Future Stages**.

The Building Asset Management Plan has been developed in accordance with the Asset Management Strategy 2007 – 2011 and the Asset Management Policy (09 POL-3) and conforms with Latrobe 2021 The Vision for Latrobe Valley.

2 Introduction

Public buildings under the ownership, care and control of Latrobe City Council make a significant contribution to the amenity and quality of life in our communities.

The fundamental purpose of the Building Asset Management Plan (BAMP) is to improve Latrobe City Council's long-term strategic management of its building assets in order to cater for the community's desired levels of service in the future. The BAMP achieves this by setting standards, service levels and maintenance programs which Latrobe City Council will develop and deliver.

The Asset Management Strategy 2007 – 2011 is the overarching document used in the development of this Asset Management Plan with the main objective being to develop a structured set of scheduled actions aimed at improved asset management to support services and provide infrastructure that is sustainable, appropriate, accessible and responsive to the needs of the community.

The International Infrastructure Management Manual (IIMM) was developed with public and private sector industry input from Australia, New Zealand, United States, South Africa and the United Kingdom. It was developed to promote best management practices and it states that the goal of infrastructure management is to meet a required level of service, in the most cost effective manner, through the management of assets for present and future customers. The key elements of Asset Management are:

- Taking a lifecycle approach;
- Developing cost effective management strategies for the long-term;
- Providing a defined level of service and monitoring performance;
- Understanding and meeting the impact of growth through demand management and infrastructure investment;
- Managing risks associated with asset failures;
- Sustainable use of physical resources; and
- Continuous improvement in Asset Management practices.

This BAMP undertakes to establish the current asset base of the buildings and structures of Latrobe City Council and also to set out the current practices and standards relating to building asset maintenance.

A comprehensive data collection process which involved locating and mapping all Latrobe City Council's buildings has been carried out. Further detailed condition assessments over and above that which the Building Maintenance Team collect as part of their annual inspection has not occurred apart from two audits already completed, namely the Leisure Facilities Technical Audit and the Condition Assessment of Children's Services Centres. The remaining buildings in the asset base will be audited over the life of this plan.

All Asset Management Plans must be able to reflect and respond to changes over time. The BAMP will continue to be developed and monitored annually with a full review to take place every four years.

The Building Asset Management Plan conforms with the Latrobe 2026 vision of sustainability to develop and implement asset management strategies for Latrobe City Council and implement whole of life maintenance requirements.

3 Scope of this Plan

The scope of this plan includes maintenance of all buildings and structures including sheds, BBQ shelters etc on land where Latrobe City Council has an interest or responsibility. These buildings and structures have been located, referenced and mapped. The management responsibility within Latrobe City Council is not clear for all of these structures and more clarity is required in relation to the boundaries with other asset categories, in particular open space and park assets.

The following table shows the current number of buildings and structures relating to this plan. It must be noted that not all buildings are owned by Latrobe City Council.

Table 1 – Total Assets Identified in the Building Asset Management Plan

Total Number of Sites or Localities	Total Number of Structures (includes all buildings at these sites)	Total Number of Buildings (includes some buildings that LCC do not own)	Total Number of Buildings with Essential Service Measures maintained by LCC
215	856	329	133

For the purposes of this plan a site may include more than one parcel of land and may also include various tenures and ownership of land.

The asset base currently comprises 856 structures which includes 329 buildings. Essential Safety Measures are presently undertaken on 133 of these buildings. Essential Service Measures include such things as exits, fire extinguishers etc. Table 2 on page 14, lists the Essential Service Measures and their inspection frequencies.

The 856 buildings and structures are located on 215 individual sites or localities.

It is probable that over the life of this plan that these numbers will change as ownership of buildings is confirmed.

This plan does not address upgrades or alterations to buildings or facilities and concentrates on maintaining existing buildings and structures.

For the purposes of this plan, building maintenance includes the building

structure, roof, walls, floors, windows and permanent fixtures, including hot water services, lighting, heating, cooling etc. It does not include fittings such as furniture, sound systems, specialist lighting systems, sports nets, refrigerators etc.

While it is understood that Latrobe City is not the owner of all of these buildings and structures, it is important to clarify each individual building's status for both maintenance responsibilities and statutory requirements. Essential Services Legislation requires building owners to be ultimately responsible for Essential Safety Measure inspections and rectification works, therefore it is important to know and document the legal owner of all buildings situated on Latrobe City Council land.

The assets considered and included in this BAMP are those for which Latrobe City Council is the responsible authority and include:

- All Latrobe City Council's owned buildings on Latrobe City Council owned land, eg Service Centres, Libraries and Leisure Centres;
- All buildings leased by Latrobe City where the maintenance responsibility rests with Latrobe City;
- All other buildings where the land is vested in Latrobe City even though no lease or rental agreement exists. These buildings have been identified and the status of ownership is being determined. They will be shown on locality maps for completeness.
- Buildings on land where Latrobe City is not the owner, such as Crown Land, but where Latrobe City has traditionally supplied maintenance services through agreements such as through a Committee of Management or through past practices.

Buildings that are occasionally leased by Latrobe City and where the building has not been subleased to another organisation and the maintenance responsibility does not lie with Latrobe City Council are not part of the scope of this plan and have not been mapped.

Each building or structure has been allocated a facility locality and each locality can be made up of one or more parcels of land under various land tenures.

While it is acknowledged that Latrobe City Council uses its building assets to provide services to the community and to provide accommodation for

organisations involved in community based activities, the community stakeholders have not been consulted or involved in the preparation of this plan. Specific stakeholder consultation will be undertaken as building upgrades, renewal or rationalisation takes place.

4 Relationship of BAMP with other Latrobe City Council Documents

An Asset Management Policy was adopted by Council in March 2003 and an Asset Management Strategy was developed following the adoption of the Policy and this strategy was adopted by Council in April 2007. The need for a suite of asset management plans was identified and a program for development of the plans was adopted with the strategy.

Figure 1 - Relationship between the Building Asset Management Plan and other Latrobe City Council Documents

The adoption of this asset management plan will further reinforce Latrobe City Council's organisational commitment towards the management of the community's assets to provide the desired level of service in the most cost effective manner for present and future generations.

5 Responsibility of Others

While it is acknowledged that Latrobe City Council is ultimately responsible for the care and maintenance of its buildings, many buildings are leased to community and sporting groups on a variety of leases and rental agreements.

There are a variety of lease types and they include:

- Seasonal leases, which are typically let to sporting clubs for a portion of the year. These leases typically require the tenants to maintain the cleanliness of the building, clean gutters and spouting and fix leaking and dripping taps. In most cases these leases do not require the tenant to carry out any other maintenance activities and in most cases the clubs are not responsible for water use.
- Longer term leases, which are typically let to community groups or some sporting clubs. These leases usually require the same minor maintenance of cleaning gutters etc and may also require the tenants to pay some outgoings, eg water usage charges.
- Various other leases are issued to a variety of clubs and community groups and some of these are on a peppercorn rental and for various timeframes ranging from months to years.
- There are also buildings where no leases are in existence and community groups occupy a building asset. These tend not to present as a problem until maintenance is required and then disputes may arise over the responsibility of each party. An example of this would be the Old Moe Courthouse, which is on crown land and the land was then vested in Latrobe City Council.

While there are a variety of leases with many varying conditions contained in each one, there are a number of instances where the same lease has been issued to two different community groups where their expectations and maintenance that the buildings receive is different.

These leases and agreements are being standardised and progressively rolled out as the older leases either expires or comes up for renewal. This is an area where increased focus on tenant's responsibilities and obligations will have a direct impact on the standard and presentation of Latrobe City Council buildings.

6 Building Hierarchies

As part of any asset management plan, hierarchies within an asset class are important to enable levels of service to be developed and to prioritise works between buildings.

Every building has been classified into one of the following hierarchies:

- Level 1 Buildings where Latrobe City Council has full responsibility.
example: Service Centres, Libraries, Leisure Centres, Maternal & Child Health Centres, Latrobe Regional Gallery etc.
- Level 2 Buildings under a Committee of Management or User Groups.
example: Preschools, some sporting facilities etc.
- Level 3 Leased buildings under seasonal or long term leases.
- Level 4 Buildings where there is no written agreement or lease and further investigation is required.
- Level 5 No maintenance undertaken to the building.
example: Buildings owned by others and buildings on land leases.

It is the intention that this hierarchy will be reduced to four levels in future updates of this plan. Level 4 buildings will be transferred to other levels as their agreements and leases become known. When there are no buildings in this category, the current Level 5 buildings will become the new Level 4 where this level only includes land leases and buildings not maintained by Latrobe City Council. The Building Inventory (Appendix 1) details the hierarchy for each structure.

7 Building Condition Analysis

An inspection report is completed for each building annually with the details recorded on an Inspection Report Form – Annual Inspection Sheet (appendix 3). The annual roof replacement program and the cyclic works programs are generated from the collation of these inspections.

Historically the results of these annual inspections reveal that approximately \$1.3 million of maintenance work is identified. A process is followed whereby the proposed works are prioritised to align with the budget provisions.

Recently at the request of Latrobe City Council's Property and Industrial Special Risks Insurer, the annual building inspection has been expanded to include inspection and reporting on property exposure risks due to malicious damage, accidental damage and extreme weather events. The inspections are arranged and either carried out by the Building Maintenance Team or nominated specialist contractors. These inspections also look for exposure to injury/illness where typically the risks are related to the potential for slips/falls, ventilation/lighting, materials storage and emergency evacuation provisions. If these risks relate to building maintenance they are dealt with, otherwise they are referred onto other Latrobe City Council officers for appropriate action.

In 2008/09 a Leisure Facilities Technical Audit was undertaken at seven sites and the results of that audit have guided major maintenance in the following years programs.

A Condition Assessment of Children's Services Centres was undertaken on 31 buildings in 2009/10 and the results of this audit will shape the works undertaken at these facilities.

8 Building Maintenance Response Times

The Building Maintenance Team react to maintenance requests through Latrobe City Council's Pathway computer system, with urgent requests being called in during normal working hours. The team also operates an after hours emergency service. This service is accessed through the Latrobe City Council After Hours Emergency Telephone Number. External users of Latrobe City Council buildings can request work through the Call Centre or via their normal contact Latrobe City Council officer.

The Pathway requests are responded to generally within the required time of three days, however this response may not include completion of the requested work. The requested work is prioritised according to urgency of the work and whether the request relates to an OH&S or public safety concern.

At present response times are not related to building hierarchy.

The current priority in responding to maintenance requests is as follows:

- OH&S and issues such as;
 - Blocked toilets
 - Trip hazards
 - Sharp objects etc
 - Gate, doors and fences
- Leisure centres and Latrobe City Council service centres and libraries
- Seasonal and other leased buildings
 - Response times are in accordance with the lease

The response times will be developed in line with the proposed hierarchies in future updates of this plan.

9 Inspection Schedules

The owner of any building other than a Class 10 building (house) is responsible for the regular maintenance and inspection of all essential safety measures within the building as outlined in the Certificate of Occupancy which is issued upon the building's completion. This certificate is conditional upon maintaining these essential safety measures.

Latrobe City Council currently have 133 buildings covered under the Essential Safety Measure inspection system. The Building Maintenance Team administer the inspections and reporting, with the actual inspections being carried out by a combination of contact and Latrobe City Council Building Maintenance Team resources.

Table 2 – Inspection Frequencies for Essential Service Measures

Building Component	Qty	Frequency	Comment
Air Conditioning Systems	8	Every 3 months	Only an essential safety measure if they incorporate mechanisms which react to fire or emergencies.
Emergency & Exit Lighting Units	326	Every 6 months	
Exit Doors	641	Every 3 months	
Fire Curtains	2	Every 3 months	
Fire Alarm Systems	7	Monthly	
Fire Extinguishers & Fire Blankets	601	Every 6 months	Inspected by CFA
Fire Hose Reels	91	Every 6 months	Inspected by CFA
Fire Hydrants	62	Monthly	Tested annually by contractor and major pressure tested every 6 years
Fire Indicies	4	Every 3 months	
Fire Resistance of Materials	2	Every 3 months	
Mechanical Ventilation Systems	11	Monthly	
Travel Paths to Exits within Buildings	133	Every 3 months	
Lift Warning Systems	3	Monthly	

10 Asset Valuation

The introduction of the Australian Accounting Standard AAS27 in 1993, introduced accrual accounting principles and practices to local governments and specified the form and content of local government's general purpose financial reports.

AAS27 required that Councils report the service potential and consumption of their infrastructure assets in Council's Annual Financial Statements. The service potential of Council assets is reported by current replacement cost and depreciated replacement cost of the asset. Asset consumption is reported as a depreciation expense.

AAS27 has been superseded by the International Accounting Standards AASB 1041 Revaluation of Non-Current Assets and AASB 116 Property Plant and Equipment.

Latrobe City Council's accepted practice of asset valuations is based on 'fair-value' method covering replacement cost, useful life and depreciation of Latrobe City Council's assets, in conformity with current International Accounting Standards as applicable to Australia. Under current accounting guidelines, all building assets owned and maintained by Latrobe City Council, are valued on the basis of 'fair value'.

The current building valuations indicate an annual depreciation of approximately \$2.469 million. Depreciation is an indicator of long-term consumption and not an indicator of immediate funding needs. The immediate funding needs will be determined through asset condition inspections.

Table 3 – Valuation Summary Based on Replacement Costs – 2009

Buildings	Replacement Cost	Written Down Value	Annual Depreciation
Buildings	\$ 127,555,000	\$ 124,980,000	\$ 2,469,000

11 Future Stages

While this is the first stage of the BAMP, it is understood that all asset management plans are intended to be dynamic documents with regular reviews, refinement and improvements. The intention is for the following actions to be addressed and incorporated into the BAMP before the next major review due to be undertaken in 2014. This will ensure that the BAMP remains relevant and also in accord with responsible asset management practices.

Further Work Identified for High Priority Actions:

- Conduct an audit to determine land ownership.
- Conduct an audit to determine which leases are for land use only, this is required to determine who the building owner is. Land leases should also contain a clause to ensure the building owners maintain the appearance of their buildings.
- Update the property database as it is not currently accurate in terms of Latrobe City Council owned land and DSE land and some private land amongst these two categories. Title searches will be required on all Latrobe City Council owned property if a definitive answer is required.
- Develop “Levels of Service” and “Response Times” if those levels of service have been reached for each hierarchy of building within any future asset management plan. It is the intention to match the level of service provided by Latrobe City Council’s building asset stock to the expectations of the community within the availability of Latrobe City Council’s resources. Service Levels are quality, performance, quantity and responsiveness standards which Latrobe City as the asset custodians aims to provide.
- Seasonal leases for sporting clubs to be standardised, to clarify the roles between the lessee and the lessor and to have better handover between seasons.
- Complete the move to other standard leases, where the tenant’s responsibility is clearly spelt out along with the maintenance responsibilities of Latrobe City Council.
- Clarify the roles of Latrobe City Council appointed Committees of

Management and their requirement to maintain facilities.

- Clarify the situation for DSE land where Latrobe City is not the Committee of Management or where the maintenance of a property or building is not the responsibility of Latrobe City. Currently there are opportunities for applications to be made to the Latrobe City Council Community Grants Minor Capital Works Program or for a specific maintenance grant.
- Update Latitude (corporate GIS) with a layer showing hierarchy of all buildings.

Further Work Identified for Low Priority Actions:

- Investigate a property management program to be used across all departments that currently have a management responsibility for leases and property management. Data is currently contained in various unlinked databases.
- Specify the conditions on when a tenant may sub-lease a building or rent out a building for a function.
- Investigate and possibly consolidate the issuing of leases and the allocation of buildings.
- Ensure that buildings leased out are suitable and comply with the BCA before arrangements are made to instigate a lease.
- Ensure that buildings which are redundant resulting from specific projects are decommissioned and removed from the asset base.
- Projects where a building or structure is constructed should consider the building that is being replaced. If that building or structure is no longer needed then plans to demolish or decommission the building or structure should be included in the project plans.

The BAMP will also be monitored and updated if required to reflect changing legislation and technology and in particular reflect Latrobe City Council and community requirements and expectations.
